This utility gives you a way to create macros that automate tasks on your keyboard in windows. Here's how it works: After installing the software, you can create a new macro by using the New Button and name it. A macro can contain one or more buttons. It works with any version of Windows (tested with 2000, XP, Vista, 7, 8) and is free. To create a macro, move to the window you want to control and press the assigned button or sequence of buttons. It is very easy, but here's a tip. The instructions for the first button appear on screen and you can keep a reference of the steps while you make the rest of the macros. The instructions are the same in all windows versions. The only problems are you don't have any help with the software: there is no instructions menu. In addition, once you've created the macro, you can't view it's list. The best way to view your macros is to save it in a file and view the file. To save a macro, move to the window you want to control and press the assigned button or sequence of buttons. A pop up menu will open, from which you can choose the file type and name of the macro. The pop up menu has the following options: %s: The shortcut is saved to the windows directory and can be used in any application, with no restriction. The shortcut consists in a sequence of keystrokes or mouse clicks and will work with any key binding configuration. %l: The shortcut is stored in the applications registry key and will only work if the control application (in this case, the macro creator) is started first. The shortcut consists in a sequence of keystrokes or mouse clicks and will work with any key binding configuration. %e: The macro creator will use the environment variables of the current session and will only work if the control application (in this case, the macro creator) is started first. The shortcut consists in a sequence of keystrokes or mouse clicks and will work with any key binding configuration. %c: The macro creator will create a shortcut under the Windows folder that can be used in any application. The shortcut consists in a sequence of keystrokes or mouse clicks and will work with any key binding configuration. Now that you know how to save and view your macros, let's have a look at some examples. To see all the keyboard shortcuts for every button, press CTRL+ALT+S. 2edc1e01e8
