What's New in the TCP IP Manager Portable?

A powerful solution for managing TCP/IP settings in your Windows operating system. TCP/IP Manager allows you to create several profiles, each with the following parameters: *- IP address *- Subnet mask *- Default gateway *- DNS server *- Network connection name (if needed) *- Proxy server *- Port number *- Enable/disable automatic startup The software can also be used to test IP settings in a real network environment. In addition, the app is equipped with a network connection manager, which allows you to detect network devices and set their IP address, if necessary. The profiles are saved in the application's database, making the software easy to use. Simply activate the profile, and the system will automatically switch to it. www.ip-tools.com Older Versions TCP/IP Manager Portable | www.ip-tools.com TCP/IP Manager Portable is a simple software application which can help you create several network profiles, and seamlessly switch between them. This is the portable counterpart of TCP/IP Manager, which means you can easily bypass the installation process. As a consequence, the Windows registry and Start menu/screen are not going to suffer any changes. Another important aspect to keep in mind, is that you can use TCP/IP Manager Portable on

any computer you have access to, by simply dropping the program files to a removable storage unit (e.g. USB flash drive). This software utility enables you to save up to 10 profiles and easily switch between them, by using the system tray. In order to create a new configuration pack, you are required to input a name, assign a keyboard shortcut, input the IP address, subnet mask and gateway, as well as the DNS server and network connection name, or obtain them automatically. It is also possible to use a proxy server. From the settings panel, you can start the app in the system tray, making it un-obtrusive, disable or enable balloon tips and restrict it to a single instance. Export of profiles is available, in CMD and BAT formats. CPU and RAM usage is low, which means the system's performance is not going to be hampered, and you can use it alongside other programs, with great ease. To sum up, TCP/IP Manager Portable is a handy piece of software, with a good response time, a user-friendly interface and a simple manner of switching between profiles.

TCP/IP Manager Portable | www.ip-tools.com This is the portable version of TCP/IP Manager, which means you can easily bypass the installation process. As a consequence, the Windows registry and Start menu/screen are not going to suffer any changes. Another important aspect to keep in mind, is that you can use TCP/IP Manager Portable on any computer

System Requirements:

OS: Windows 7/8/10 64 bit Processor: Intel Core 2 Quad Q9300 2.66GHz 4GB RAM: 4GB 8GB Graphics: NVIDIA GeForce GT550M 2GB Hard Drive: 120GB Optical Drive: DVD or CD Audio: DirectX compatible sound card Network: Version 11
